A SUSTAINABLE UMBRELLA

MADE WITH RECYCLED PLASTICS & BAMBOO

An eco-friendly, automatic open/close mini-umbrella with a fabric cover made from recycled plastics and featuring a bamboo handle

ENVIRONMENTAL RESPONSIBILITY IN YOUR HANDS...

To make the umbrella cover, plastic waste is collected and cleaned, then made into granules. The granules are heated and melted to create a polyester fibre which can now be woven into a material for the cover. The handle is produced using sustainable bamboo.

All products displaying names or trademarks within this mailing are not necessarily indicative of supply or endorsement by the owner of the trademark, but are merely representative of what can be achieved with branded promotional merchandise.

Cover made of recycled plastic and has a windproof frame system

Bamboo handle manufactured from a sustainable material

- ✓ **Convenient, automatic open/close function for quick opening and closing via push-button**
- ✓ **High-quality windproof system for maximum frame flexibility in stormy conditions**
- ✓ **Supplied with a protective sleeve**

BRANDING & COLOUR OPTIONS

The umbrella features 8 panels on the cover, any of which can have a full-colour print. On the bottom of the bamboo handle there is a promotional labelling option. The tie wrap and sleeve also have the option to be branded.

Black

Navy
