SOLAR POWER BANK CHARGER

USE THE SUN, NOT THE PLANET'S RESOURCES,
TO CHARGE YOUR ELECTRONIC DEVICES

MAKING A MORE SUSTAINABLE CHOICE

We all make choices about how we care for the planet, so sometimes getting people to change their views and actions can be a complex matter. But it's often the case an individual or organisation simply needs a nudge to act in a more eco-friendly way or to choose a more sustainable product.

Let's take this solar power bank charger. It could be used in a campaign or promotion as a gift for customers. Equally, a responsible company might want to improve the connectivity of its employees by providing the solar charger to staff.

A FULL FEATURED CHARGER

- ✓ Solar-powered
- ✓ 5000mAh capacity
- ✓ Shockproof
- ✓ Splashproof
- ✓ Built-in flashlight
- ✓ Comes with carabiner clip

Splashproof

Built-in Flashlight

Clips on to Bag with Carabiner

LOADED WITH FEATURES

Our solar power bank charger has a 5000mAh capacity, which is good for at least 2 or 3 full charges of a smartphone or tablet. It has two output ports (for dual charging) rated 5V/1A and 5V/2A respectively. There's a 5V/1A input too, just in case you need to reboot your charger without any available sunlight.

The charger's sturdy body is made of an ABS+PVC material and available with black, green, blue or yellow trim. Thanks to this and the protective port covers, this solar power bank charger is shockproof, dustproof and splashproof.

It comes with a useful carabiner, so it can be handily clipped to a bag or rucksack to charge on the move. The charger also has a flashlight built-in and weighs just 150g. It really is the ideal charger to keep your electronic devices fully charged everyday for business or on those adventurous outdoor trips!

Choice of Colours

The charger can be branded with your company logo
